

Building Energy Compliance Services

Disclose with Confidence and Ease

The buildings sector is the single largest user of energy in the United States and now, local governments are mandating the benchmarking and disclosure of building energy data. Non-compliance can result in significant monetary fines which can total thousands of dollars or possible denial, suspension, or refusal of operations.

Schneider Electric's Building Energy Compliance Services along with our industry leading energy and sustainability management platform, Resource Advisor, can support all facets of your benchmarking and disclosure efforts.

Types of building required to disclose:

- Large commercial
 - retail, grocery chains, hospitals, office buildings, hotels, and other large commercial buildings.
- Public
- Institutional
- Multi-family

A sampling of cities requiring disclosure:

- Austin
- Chicago
- Minneapolis
- New York
- San Francisco

Whether a single facility or thousands of buildings across a portfolio, our secure solution can accumulate and data load whole building metrics eliminating the need for manual input. Our team is equipped to satisfy your portfolio's benchmarking and compliance requirements and provide recommendations on process improvement decisions.

Our services

- ➔ **Market Intelligence:** Provide details of up and coming energy legislation occurring in the United States affecting your portfolio and their various compliance requirements.
- ➔ **Benchmarking Support:** Determine applicability of sites in your portfolio, gather and aggregate metrics, setup of initial portfolio in benchmarking platform, generate compliance reports to requesting parties, provide data verification support, and maintain ongoing benchmarking efforts.
- ➔ **Audit Support:** Provide on-site energy audits, retro-commissioning services, Energy Action Plans, and third-party data verification support by licensed engineers and energy professionals.

ENERGY STAR Link

Resource Advisor's ENERGY STAR Link, provides a fully automatic data link to the US Environmental Protection Agency's Portfolio Manager. Through this automatic exchange, monthly consumption data is extracted from your energy invoices, warehoused in Resource Advisor and automatically exchanged with Portfolio Manager. ENERGY STAR scores for your portfolio are always up-to-date and able to be accessed anywhere, anytime, through the single Resource Advisor dashboard that normalizes performance over time for a portfolio-wide performance view.

Let us keep you in compliance and help you keep track of new regulations in this quickly evolving market! Contact us at: sustainability@ems.schneider-electric.com.
